

# Julia Dawson

Established and customer-oriented senior clinical pharmacist with over 5 years of experience in hospital and community settings. Reputable track record of compounding and dispensing medications, providing pharmaceutical advice, and monitoring customers' drug therapies. Adept at managing complex medication regimens, conducting drug reviews, and collaborating with health professionals to improve patients' health and well-being.

## Work experience

### Senior Clinical Pharmacist

2019 - Present

NHS Trust, London, UK

Provided patient-centred care by preparing medications, giving pharmacological advice to multidisciplinary healthcare teams, and monitoring patient drug therapies for potential incompatibilities. Collaborated with physicians, nurses, and other healthcare professionals to improve patient outcomes to prevent medication-related problems. Developed and executed a clinical decision support system, improving drug therapy outcomes.

- Mentored and trained 10 junior pharmacists, improving their knowledge and skills in medication management, patient counselling, and pharmaceutical care.
- Conducted a thorough analysis of medication ordering and dispensing processes, identified inefficiencies, and implemented cost-saving measures that led to a 15% reduction in pharmacy expenses over six months.

### Lead Clinical Pharmacist

2016 - 2019

University College London Hospitals, UK

Led a team of highly skilled pharmacists and technicians, ensuring they delivered exceptional patient care. Conducted thorough medication reviews and developed evidence-based care plans for patients with complex medication regimens. Collaborated closely with healthcare teams, including physicians and nurses, to optimise medication therapy and reduce medication-related errors.

- Developed and delivered a comprehensive training program for new pharmacists, resulting in a 20% increase in deliverables.
- Implemented a medication safety program that reduced medication errors by 40%, improving patient safety and quality of care.
- Collaborated with healthcare providers to optimise medication therapy for patients with complex medical conditions, resulting in a 30% decrease in readmissions due to adverse drug reactions.
