EDUCATION

Master of Science in Social Innovation and Entrepreneurship

Birmingham School of Economic and Political Science, UK, 2023

- International field trip: Sustainable home farming and child care in Cape Town, South Africa.

Bachelor of Science in Innovation and Social Impact (2:1)

Novus Tech University of Birmingham, UK, 2021

- Relevant coursework: Design Thinking and Human-Centered Innovation, Social Entrepreneurship and Sustainable Solutions, Technology for Social Change.
- Project: Collaborated with a team to develop a technology-based solution to improve access to education and healthcare in underserved communities. Presented the project to a panel of experts and received positive feedback.

WORK EXPERIENCE

Sustainable Development Intern, Global Harmony Organisation, UK | 2022

Collaborated with a team of sustainability experts to assess company operations' environmental impact and identify improvement areas. Conducted extensive research on best practices in renewable energy and resource management, contributing to implementing eco-friendly initiatives.

- Played an active role in analysing data and preparing reports on energy consumption and waste reduction strategies, aiding in developing actionable sustainability plans.
- Attended sustainability conferences and workshops to stay up-to-date with the latest trends and innovations in sustainable development.

Research Intern | InnovateQuest Research Solutions, UK | 2021

Assisted in designing and executing experiments, precisely collecting and recording data, and conducting in-depth statistical analysis, contributing to successfully completing research projects within one year. Collaborated with a team of researchers, fostering a cooperative environment that encouraged knowledge sharing and efficient problem-solving.

- Demonstrated effective communication skills by presenting research findings and methodologies in weekly team meetings, facilitating fruitful discussions and receiving commendations.
- Developed and implemented a streamlined data collection process, reducing data acquisition time, and allowing the team to focus on more in-depth analysis and interpretation.
